

The Sustainable Aviation Buyers Alliance (SABA) is open for new members!

SABA's founding companies, EDF, and RMI invite you to #flySABA

Join us in accelerating the transition to net zero aviation by reducing your air transport emissions through high-integrity Sustainable Aviation Fuel (SAF).

SAF available today **can achieve lifecycle greenhouse emissions reductions as high as 80% when compared to fossil jet fuel**, but currently represents less than 0.1% of global aviation fuel. SABA's mission is to accelerate the path to net zero aviation by driving investment in high-integrity SAF.

Who can join SABA now?

- **Businesses and non-profits** seeking to reduce their air transport emissions from business travel and freight as a way to meet their climate commitments
- **Airlines** seeking to work with each other and customers to scale SAF production, drive down SAF costs, and create a more transparent SAF market

We offer membership options tailored to your needs.

Different membership fees apply to each tier and organization type.

GREEN CUSTOMERS	GOLD CUSTOMERS	AVIATORS
Open to Air Transport Customers: Businesses, Non-Profits		Open to Airlines
